

Friends of the Teton River would like to track students' attitudes about the environment and what they have learned about their local water resources. To help us do this, please distribute pre and post "tests" to students before and after they have completed a *Teton Watershed Curriculum* unit, project, lesson or field trip. You can send or drop off the pre/post tests to the address:
Friends of the Teton River
36 East Little Avenue (next door to O'Rourke's)
P.O. Box 768
Driggs, ID 83422
or call 208-354-3871 for a staff member to pick them up at your school office.
Please close this document and look over the "Student post test" in the Tutorial Folder.

What are you studying about water today? _____

There are no right or wrong answers, just tell me what you think!

1. Do you already know anything about the water subject you are studying today?

2. What else do you know about water?

3. Is water important? Why or why not?

4. Name something you already do to help our local water resources or environment.
